Dear Sir:

In response to the restriction requirement set forth in the Office Action of October 25, 2000, Applicants hereby elect Group I, containing claims 1-11 drawn to a polymer, with traverse.

The Examiner has required the election of a single disclosed species for examination purposes, including an election of all starting moieties, and final content and properties.

Applicants elect as the species to be examined a thermoplastic elastomer having hydroxy-terminated BAMO prepolymer as the A-blocks and hydroxy-terminated AMMO prepolymer as the B-blocks. The linking compound of this species is derived from toluene diisocyanate (TDI) as the "diisocyanate for end-capping" and a difunctional oligomer formed by reacting butane diol with TDI. The

final properties of the thermoplastic elastomer include a weight average molecular weight of at least 80,000 and a number average molecular weight of at least 15,000.

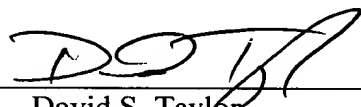

The elected species reads on each of claims 1-11.

If there are any other moieties, properties, or final content information that the Examiner requires for examination of this single disclosed species, please advise by calling the undersigned.

Respectfully submitted,
